

While running the installer, in the third step, you should see this screen:

The problem with the latest operating systems is that it is a bit picky regarding the folders where programs are installed.

Normally EasyBooks is installed into a folder **C:\Program Files\EDP\EasyBooks**
But on Vista the destination is changed to the folder **C:\EDP\EasyBooks**

Click on "Browse..." button and install it into **C:\EDP\EasyBooks**
